Oil Coalescing Filters

Use to remove aerosols, solid contaminants and oil vapors from compressed air systems using lubricated compressors. Coalescing filters offer a much higher degree of oil removal efficiency than standard air filters.

The automatic drain works on pressure of 20-175 PSIG and has 1/8" NPT drain port. This filter removes 99.97% of all aerosols—unmatched by any other method.

ORDERING INFORMATION			
ORDER #	Size	SCFM	Element
Metal Bowl			
OCF114M	1/4	15	OCFE114
OCF112M	1/2	60	OCFE112
Polycarbonate Bowl w/Guard			
OCF114P	1/4	15	OCFE114
OCF138P	3/8	35	OCFE138
OCF112P	1/2	60	OCFE112

Standard or "Pre Filter" Air Filters

With new mini-style thermostats and smaller orifices used in pneumatic control, it is essential that you deliver very clean air. Contaminants can cause more trouble with new equipment than ever before. The Pneuline 5-Micron Reusable Pre Filter traps dirt and aerosols in its 11 ounce bowl. For Automatic Drain, add "-AD" to end of model number (example: SAF114M-AD)

ORDERING INFORMATION			
ORDER #	Size	SCFM	Element
Metal Bowl			
SAF114M	1/4	55	SAFE101
SAF138M	3/8	90	SAFE101
SAF112M	1/2	115	SAFE101
Polycarbonate Bowl w/Guard			
SAF114P	1/4	55	SAFE101
SAF138P	3/8	90	SAFE101
SAF112P	1/2	115	SAFE101

Combination Filter-Regulators

These units are very useful where space is at a premium. Combination units have a transparent plastic bowl with a flexible drain. The regulator on this unit is self-relieving with a secondary pressure range of 3 to 125 PSIG.

ORDERING INFORMATION		
ORDER #	Size	SCFM
CFR118	1/8	13
CFR114	1/4	23
CFR138	3/8	46
CFR112	1/2	46

NOTE: Order gauges separately—see **GAUGES**

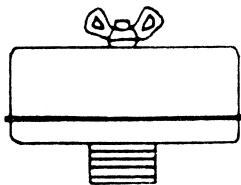

"EL Cheapo" Filters!

For continuing contamination problems, this filter is a very inexpensive solution. The refill is very readily available in any janitor's closet—a roll of toilet paper! Handy for emergency use when there is a failure in your air station filtration system. Element included.

ORDERING INFORMATION	
ORDER #	Description
M-30	Compressed Air Filter
No.2	Replacement Roll

Size: 1/4" NPT

Intake Filter Replacement Kits

Where clean air begins—every compressor intake air filter should be inspected regularly and replaced promptly when needed. The Pneuline replacement kit is about the same cost as the factory element only. Once the replacement kit is in place, replacement cost is minimal.

ORDERING INFORMATION		
ORDER #	Size	CFM
IF004	1/4	7
IF003	3/8	7
IF002	1/2	10
IF034	3/4	20
IF001	1"	20

For element only - order replacement No. IFE004 for 1/4 and 3/8 in. sizes; No. IFE002 for 1/2 in. and above.

DON'T FORGET!

Replace your compressed air filters **regularly!**
Most control problems start with dirty air...
