

Honeywell Fan Coil Valves with Snap-On Heads

This latest generation of sweat valves include a convenient new design. The valves and operators are packaged separately. Just select the size and body you require and just snap the head and valve together—either before or after you seat the valve body in. Installing the valve body is easier and quicker if the actuator is not attached. Simply press the quick release button to remove the head. Used for controlling fluids in commercial HVAC equipment such as fan coil units, terminal reheat coils and convectors.

Features:

- Spring return
- Stainless steel cover
- Hot water, chilled water, or 50% glycol
- Quick opening
- Manual opener
- Actuator removal without draining the system
- Humidity resistant
- Triple O-ring seal
