

Refrigerated Air Dryers

Dryer shown with optional bypass valve

Today's "mini" style pneumatic thermostats have smaller orifices and ports. To ensure long life, check the capacity of your air dryer system. Your discharge air temperature should not exceed 40°F. By installing the correctly-sized air dryer you will greatly reduce the need to service a moisture-contaminated system

In Stock at NECC!

- RAD105
- RAD110
- RAD115
- RAD125
- RAD135

All available for immediate shipment!

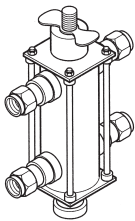

NOTE: The RAD105, 110 and 115 are available with a pre-piped bypass valve, oil removal filter and pressure reducing valve. Just add a "-PKG" to the model number. Larger air-cooled sized available up to 2000scfm. Call for prices and sizing help. 120V Standard — 230V Available
