NEW!
Plug-in Replacement Burner Control Modules for Honeywell's BC7000/PM720 or R4140

Honeywell has developed a plug-in replacement for the obsolete R4140 and BC7000 series controls. This new control will plug into the Q520 subbase with NO WIRING CHANGES. The only components that need to be added are a flame amplifier (R78xx) and a purge timer (ST7800A) you can also use the Keyboard Display Module (S7800A) if desired.

CALL US WITH YOUR OLD MODEL NUMBER AND WE WILL GIVE YOU THE MODEL NUMBER OF YOUR NEW SOLID STATE REPLACEMENT CONTROL.

Honeywell Replacement Packages For Fireye "P" Series Relays

Designed for plug-in field replacement of 43 Fireye "P" Series programmers. Call with your model number to be replaced and we will select a programmer, amplifier, adapter subbase and detector. Your order will have complete replacement instructions.
