

## ADVANCED ELECTRONIC TIME CONTROLS

The Talento electronic time switches provide time-of-day control for lighting, heating, air conditioning, pumps, motors or general electrical circuits. The "400" series are 24-hour/7-day controls, while the "800" series units offer 365-day programming with holiday capability through the year 2095. All models offer automatic leap year and daylight savings adjustment.

In addition to the conventional On/Off programming format, these units offer pulse and cycle functions. A pulse is simply an on or off event with a duration of one or more seconds. The cycle function provides for a repeating on event within a selectable total cycle. Both the on duration and the total cycle duration are independently programmable in minutes or seconds. In addition, the cycle function can be set to repeat indefinitely or to occur within a time and/or date range.

### Features:

- 1, 2 & 4 channels programmable independently or simultaneously
- Automatic leap year and Daylight Savings Time adjustment
- Pulse programming for school bells, sirens or lighting contactor applications
- Cycle programming for pump and other sequencing applications
- Lithium battery backup keeps clock running
- EEPROM Non-volatile program memory
- Astronomical function on Talento 800 series (requires software)

ORDERING INFORMATION				
ORDER #	VOLTAGE	CHANNEL	OUTPUT	PROGRAMS
TALENTO 471-24	24VAC/DC, 50/60Hz	1	16A SPDT	30
TALENTO 471-120	120VAC, 50/60Hz			
TALENTO 891-24	24VAC/DC, 50/60Hz			400
TALENTO 891-120	120VAC, 50/60Hz			
TALENTO 472-24	24VAC/DC, 50/60Hz	2		30
TALENTO 472-120	120VAC, 50/60Hz			
TALENTO 892-24	24VAC/DC, 50/60Hz			400
