

For your convenience, we have selected the most popular styles and signals in a handy chart so you don't have to make up the part number yourself. You'll also see there is a column showing the most common signals for the best known manufacturers. We hope you find this a handy resource.

Air Insertion Duct Temperature Sensors

TE702 series duct sensors shown have a polycarbonate enclosure and terminal block. They provide a cost effective solution for air handlers, fan coil units, ducts, plenums or furnaces. Includes a duct mount bracket.
